MOTOROLA RAZR™ HD

LIFE. POWERED.

AT A GLANCE

Combining a huge HD display, blistering fast processor, and long-life battery in an impossibly thin design, MOTOROLA RAZR™ HD has tons of advanced features for everything you want to do.

Use this guide to get started, then see “WANT MORE?” to get all the help you need.

Note: Certain apps and features may not be available in all countries.

START

Note: This product uses a non-removable battery.

Tip: In the unlikely event that your device becomes unresponsive, try a forced reboot—press and hold both the Power key and the down volume key for up to 10 seconds.

Caution: Before assembling, charging, or using your phone for the first time, please read the important safety, regulatory and legal information provided with your product.

SET UP & GO

Create or log in to your Google™ account to get access to all of your Google services, like Gmail™, Google+, Google Play™, and more. Registration is secure and only takes a few minutes.

Note: This phone supports apps and services that use a lot of data, so make sure your data plan meets your needs. Contact your service provider for details.

HOME & APPS

Your two main phone screens—Home and Apps. The home screen is what you see when you turn on the phone or touch Home . To see all of your apps, just touch Apps .

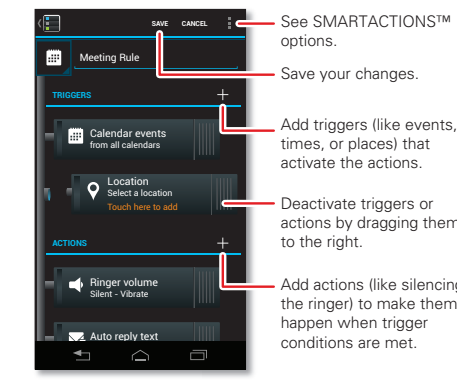

Want more? No problem. To download more apps from the Google Play™ Store, touch Apps > Play Store.

SMARTACTIONS™

Tired of doing the same tasks over and over again? Let the SMARTACTIONS™ app do them for you. You can create rules to do things, like set your ringer to vibrate at work, or send auto-reply messages when you're busy.

To learn more, touch Apps > Smart Actions > Menu > Help.

WANT MORE?

There's more help, more accessories, more free stuff. We're here to help.

- **Answers:** Touch Apps > Help Center.

BUSINESS
READY

This product meets the applicable limit for exposure to radio waves (known as SAR) of 2.0 W/kg (ICNIRP). The limits and guidelines include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The highest SAR values measured for this device are listed in the regulatory information packaged with your product.

Note: When using the product while worn on your body, either use an approved accessory such as a holster or maintain a distance of 2.5 cm (1 inch) from the body to ensure compliance with SAR requirements. Note that the product may be transmitting even if you are not making a phone call.

Regulatory Information

For Your Safety

Before assembling, charging or using your mobile device for the first time, please read the important product safety and legal information provided with your product.

Specific Absorption Rate (ICNIRP)

YOUR MOBILE DEVICE MEETS INTERNATIONAL GUIDELINES FOR EXPOSURE TO RADIO WAVES.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields) recommended by international guidelines. The guidelines were developed by an independent scientific organization (ICNIRP) and include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The radio wave exposure guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit for mobile devices is 2 W/kg.

Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands. The highest SAR values under the ICNIRP guidelines for your device model are listed below:

Head	UMTS / GSM / LTE, Wi-Fi, Bluetooth	0.61 W/kg
Body	WCDMA 850MHz, Wi-Fi, Bluetooth	0.43 W/kg

During use, the actual SAR values for your device are usually well below the values stated. This is because, for purposes of system efficiency and to minimize interference on the network, the operating power of your mobile device is automatically decreased when full power is not needed for the call. The lower the power output of the device, the lower its SAR value.

If you are interested in further reducing your RF exposure then you can easily do so by limiting your usage or simply using a hands-free kit to keep the device away from the head and body. Additional information can be found at www.motorola.com/rfhealth.

European Union Directives Conformance Statement

The following CE compliance information is applicable to Motorola mobile devices that carry one of the following CE marks:

CE 0168

CE 0168

[Only Indoor Use Allowed In France for Bluetooth and/or Wi-Fi]

Hereby, Motorola declares that this product is in compliance with:

- The essential requirements and other relevant provisions of Directive 1999/5/EC
- All other relevant EU Directives

Product Approval Number

The above gives an example of a typical Product Approval Number.

You can view your product's Declaration of Conformity (DoC) to Directive 1999/5/EC (to R&TTE Directive) at www.motorola.com/rte (in English only). To find your DoC, enter the Product Approval Number from your product's label in the "Search" bar on the website.

Additional Regulatory Marks

In addition to the physical regulatory marks on your mobile device, other regulatory marks may be able to be displayed through the menu of the phone as follows. To view, choose Settings -> System settings -> About Phone -> Legal information -> Regulatory.

General – Important: Changes or modification to this product not authorised by Motorola may void the compliance certification.

FCC Notice to Users

The following statement applies to all products that bear the FCC logo and/or FCC ID on the product label.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. See 47 CFR Sec. 15.105(b). These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See 47 CFR Sec. 15.19(a)(3).

Motorola has not approved any changes or modifications to this device by the user. Any changes or modifications could void the user's authority to operate the equipment. See 47 CFR Sec. 15.21. For products that support Wi-Fi 802.11a (as defined in product information): In the United States, do not use your device outdoors while connected to an 802.11a Wi-Fi network. The FCC prohibits such outdoor use since frequencies 5.15-5.25 GHz can cause interference with Mobile Satellite Services (MSS). Public Wi-Fi access points in this range are optimized for indoor use.
